To Whom It May Concern,

Many allies in the environmental community are supporting S.B. 570, which would lower and cap the fixed charge for electrical service at \$10/month for residential customers and \$25/month for small business customers. High fixed charges effectively penalize customers that use less electricity, because more of their bill is out of their control. This works against Connecticut's stated climate and energy efficiency goals and unfairly hits hardest those who can least afford to pay.

Thanks for your consideration.
